Call theme: Enhancing well-being for the future

The theme can be approached from a variety of perspectives and disciplines in the social sciences. It enables and encourages multi-disciplinarity and provides opportunities for pan-European research integrating researchers from different regions of Europe, and for comparisons across various contexts. The present call proposes to focus the research on the following themes:

Crises, challenges, and well-being

- Short- and long-term effects of crises and stressors on well-being
- Well-being in children and adolescents: effects of policies and interventions
- Well-being over time and prediction models

Well-being and mental health

- Well-being and health in turbulent times
- Building the basis for population-level and individual-level interventions
- Children and adolescents as vulnerable social groups

Environmental challenges and well-being

- The impact of climate change on well-being and mental health
- Specific effects of urbanicity, housing, and community structure
- Effects of workplace and organization on well-being

Well-being, economy, and politics

- Well-being in relation to income, age, education, geography, and other economic and political factors
- Economic growth, socio-political polarization and well-being
- Well-being of marginalized groups
